

## Successful Installation of Auto registration system at Lokmat !

The first Auto Registration & Cut Off control system from manroland India has been successfully installed & commissioned on a non-manroland press in India at Lokmat in Navi Mumbai.

This shows the versatility of the equipment.

This system is mounted on six Tower Orient (TPH) shaftless printing press and it is equipped with 16 GraphoMetronic cameras.

The system is a combination of 10 Inline Register Smart Cameras, 2 Inline Register Smart Plus (Dual Purpose Cameras) and 4 CutOff Register Cameras. The Cameras are very Robust in nature with metal body which enhances its life. Similar Cameras are used on manroland High speed Presses.

The Operating system is user friendly and designed as per the customer requirement.

This is the first installation on a non-manroland press in India.

**GraphoMetronic  
control systems  
from manroland  
are now  
available to be  
fitted on  
all kinds of
