

Message from MD

In line with the success stories of manroland web systems in the year 2017, there has been yet another breakthrough. The latest one being in Kolkata, India where manroland sold a three tower CROMOMAN 4-1 press to Bartaman, one of the leading Bengali language newspapers coming out of the eastern part of the country. The press has been sold with a Service Level Agreement and is the second CROMOMAN 4-1 to be installed in eastern India.

This deal is very important for manroland web

systems as it signals the entry of the Augsburg based behemoth into the flourishing Indian language newspaper market. This helps assuage the feeling that manroland web systems is an expensive piece of machinery, not suitable for the regional newspaper market in India, manroland web systems is proud to be associated with Bartaman and wants to be its partner in success for the times to come.

BUILDING ON THE RELATIONSHIP which saw a new CROMOMAN 4X1 commissioned at Namasthe Telangana in 2016, manroland India has been called in to move one of the publisher's Hiline presses. Relocation of the single-width Manugraph Hiline press within the same building was completed this month and the press is under production.

Another service order for Interbus loop upgrade for COLORMAN at Hindustan Times, Noida. Will start in mid- March and will be completed by end of the month.

manroland worldwide

Major order for Newspaper press!

manroland web systems and China National Complete Plant Import & Export Corporation Limited signed a contract for 9 highly automated UNISSET newspaper press lines for the Cuban governmental newspaper Granma. The new equipment is part of a strategic investment project for Cuba. The UNISSET presses will be installed in the cities of Havana, Holguin and Santa Clara where they will produce, besides the major Cuban newspaper "Granma", other newspaper products and books.
