

## Message from MD

The 26th edition of WAN IFRA India 2018 Conference was held on 26-27 September in Hyderabad, India. The two-day event featured an industry get-together with more than 400 senior publishing executives from over 25 countries & 27 exhibitors displaying their offerings at the expo.

manroland presented the latest offerings with focus on manroland-GOSS merger, CROMOMAN 4X1, Service portfolio & Printcom.

manroland India sponsored the plant visit to showcase CROMOMAN 4X1 at the modern & state of art facility at Namasthe Telangana. It was a very successful event. More than 60 delegates visited the plant.

The delegates were particularly overawed at the quality of printing of photographs in the editions of Telangana Today and Namasthe Telangana.

### Australian printer modernizes existing press with manroland Goss web systems

Upgrades and retrofits from manroland Goss web systems increase production efficiency, quality and the availability of the press and so the newspaper printer News Corp Australia opted for an upgrade with a gluing system from Planatol, a retrofit for the production of additional formats and an e-retrofit of the controls of the existing UNISSET and REGIOMAN presses at their printing site in Yandina

### Prensa Libre, Guatemala, expands existing printing press

Prensa Libre, the leading daily newspaper in Guatemala, is expanding its existing UNISSET system with an additional heatset line. This is intended to improve efficiency and flexibility for the daily printing of various supplements and schoolbooks and, in the near future, also bible pages. As a result of the new heatset equipment, even more products can be produced in daily operations ensuring the full utilisation of the printing shop's capacity
