manroland | GOSS

July 2021

Message from Sudeep Bhattacharjee  
Managing Director

**Project TBO-** Technicians from manroland Goss India carried out the installation of all the three machines (2 CROMOMAN and 1 ROTOMAN) at Gelan site of TBO Printing and Publishing. The installation was started in the month of September 2019, immediately after the Ethiopian New Year.

However, the service team had to stop the project by end of March'20 when the Covid pandemic struck the entire world. The project was resumed in September'20 once the travel restrictions were lifted.

The entire service team of manroland Goss India participated in the installation and commissioning of these machine.

VARIOMAN c:line

**Project ROSA** -The project ROSA is in full swing. manroland Goss bagged the order for VARIOMAN c:line from the newly founded company ROSA. The VARIOMAN print units are under construction and software tests are already done in Augsburg.

Delivery of the print units is scheduled for early August this year with aim to start production in January 2022.
