Discover the values of green

- We are constantly looking for even better **solutions** for the printing industry. The features of **dampening and ink rollers** are continuously improved. We manufacture complete rollers, supply exchange rollers, offer fully refurbished units and a full repair service. Whether sheetfed or webfed rollers are needed, whether newspaper or continuous printing is involved – the industry relies on **Westland rollers**

Discover the value of LotoTec®

- In the LotoTec® system, the rubber roller is coated with a liquid fluorinated rubber. This produces a roller with **mirror finish** and little sensitivity to thermal, chemical and mechanical impacts. LotoTec® works like a **diffusion barrier** and prevents the well known printing problems, such as cording or annular swelling.
